

Huỳnh Minh An

Fullstack Developer

+84 869 428 117 | Ho Chi Minh City, Vietnam
huynhminhanc5.pbchau@gmail.com | github.com/minhancr123

Professional Summary

Fullstack Developer with hands-on experience building B2B SaaS, POS, warehouse management, HRM/payroll, e-commerce, and streaming web applications. Strong in Next.js, ReactJS, React Native, TypeScript, Node.js, NestJS, RESTful APIs, MySQL, Redis, Docker, and Nginx. Experienced in optimizing real business workflows, including reducing query response time from 3000ms to 100ms and improving operational efficiency through inventory and payroll automation. Fast learner with strong problem-solving skills and a product-focused mindset.

Work Experience

Fullstack Developer

Aug 2025 – Mar 2026

SOF – Solution Of Future

Ho Chi Minh City, Vietnam

- Developed B2B SaaS products for POS, warehouse management, pallet tracking, HRM, and payroll systems used by enterprise customers.
- Built invoice management features and real-time revenue dashboards, enabling business users to track sales by day, month, year, and product trends.
- Developed warehouse and pallet management modules with QR/barcode synchronization between mobile devices and backend services.
- Improved inventory validation, stock tracking accuracy, and operational efficiency through warehouse workflow automation.
- Implemented HRM and payroll features with complex salary calculation logic, attendance tracking, and employee management workflows.
- Optimized attendance queries using indexing and keyset pagination, reducing response time from 3000ms to 100ms.
- Applied frontend data prefetching techniques to improve page responsiveness and user experience.
- Collaborated using Git workflow, including branching, pull requests, code review, and feature delivery.
- Tech Stack:** PHP, ReactJS, ElectronJS, MySQL, CouchDB.

Personal Projects

Movie Streaming Platform

Jun 2025 – Present

Team size: 5 | Role: Fullstack Developer

- Built a full-stack movie streaming platform with adaptive HLS playback and responsive UI using Next.js and Tailwind CSS.
- Integrated Redis caching and Server-Sent Events to support real-time view tracking.
- Implemented a proxy and caching layer to securely fetch and serve movie data from external providers.
- Applied modular architecture and clean code practices to improve scalability and maintainability.
- Used Docker, Vercel, GitHub, and GitHub Actions for deployment and CI/CD workflow.

Tech Stack: Next.js, TypeScript, Node.js, Tailwind CSS, Redis, Vercel, Docker, GitHub Actions

MegaMart – E-commerce Website

May 2025 – Jun 2025

Team size: 4 | Role: Backend Developer

- Built RESTful APIs for an e-commerce platform using NestJS, TypeScript, Prisma, and MySQL.
- Implemented JWT authentication and admin management features for product, user, and order operations.
- Designed responsive frontend pages using Next.js and Tailwind CSS.
- Deployed the application using Docker Compose and Nginx reverse proxy.

Tech Stack: Next.js, Tailwind CSS, NestJS, TypeScript, JWT, MySQL, Prisma, Docker, Nginx

GitHub: github.com/minhancr123/MegaMart

Skills

Frontend: ReactJS, React Native, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3
Backend: Node.js, NestJS, Express.js, PHP, C#, ASP.NET Core, RESTful APIs, JWT Authentication
Database: MySQL, PostgreSQL, SQL Server, CouchDB, Prisma ORM, SQL Optimization
DevOps and Tools: Docker, Docker Compose, Nginx, Redis, Git, GitHub Actions, Postman
Core Knowledge: OOP, Data Structures, System Design Basics, API Design, Security Basics, Linux
Soft Skills: Fast Learner, Collaboration, Problem Solving

Education

Ho Chi Minh University of Industry and Trade <i>Bachelor's Degree in Information Technology</i>	Jul 2022 – 2026 <i>GPA: 3.52 / 4.0</i>
---	--

Achievements

First Prize – Student Scientific Research Competition Research Topic: Degree Verification using Hyperledger Fabric Blockchain	2025
